SHUBHENDU PANDEY

QA LEAD/AUTOMATION TEST ENGINEER

Phone: (+91) 9760402107
Email: shubhendupandey5@gmail.com
Location: Noida, India
GitHub: https://github.com/ShubhenduPandey
Experience: 10 Years

PROFESSIONAL SUMMARY

Results-driven **Lead QA Automation Engineer and SDET** with **10 years of experience** architecting robust test automation frameworks, managing quality lifecycles, and leading QA engineering teams. Deep expertise in end-to-end web and API test automation utilizing **Playwright with JavaScript and TypeScript**, incorporating custom fixtures, Page Object Model (POM), parallel execution, and Trace Viewer diagnostics. Specialized in validating **AI systems and Retrieval-Augmented Generation (RAG) models**, assessing context relevance, document grounding, and hallucination reduction. Expert in utilizing developer AI tools—including **Claude Code, OpenAI Codex, and GitHub Copilot**—to streamline test automation authoring, refactoring, and code review. Proven track record across **Microsoft Azure cloud environments** (Azure DevOps, Azure Pipelines, App Services). ISTQB CTFL and CTAE certified leader skilled at driving release predictability and slashing deployment turnaround times by up to 80%.

CORE TECHNICAL SKILLS

- **Test Automation & Frameworks:** Playwright, JavaScript, TypeScript, Page Object Model (POM), Custom Test Fixtures, Parallel Test Execution, Trace Viewer, Network Interception & Mocking, Selenium WebDriver, Cypress, WebdriverIO, Appium.
- **AI & LLM Systems Validation:** Retrieval-Augmented Generation (RAG) Testing, Groundedness & Hallucination Assessment, Vector Search / Context Retrieval Validation, AI-Assisted Test Automation (**Claude Code, OpenAI Codex, GitHub Copilot**), Prompt Evaluation, Azure OpenAI.
- **Cloud & DevOps:** Microsoft Azure (Azure DevOps, Azure Test Plans, Azure Pipelines, Azure Blob Storage, Azure App Services), CI/CD Implementation, GitHub Actions, Docker, Bitbucket Pipelines.

- **API Testing & Integration:** REST API Automation, Playwright APIRequestContext, Postman, JSON Schema Validation, Swagger / OpenAPI, Authentication (OAuth 2.0 / JWT), HTTP Endpoints & Contract Testing.

- **Test Engineering & Tools:** Test Strategy & Planning, Functional & Regression Testing, Defect Lifecycle Management, Root Cause Analysis, Jira, Xray, Git, VS Code, BrowserStack, JMeter.

PROJECT EXPERIENCE

First Rule Contact Manager | *5 Years*

- Architected and scaled an enterprise-grade **Playwright automation framework** using **TypeScript and JavaScript** for multi-tenant contract management and review platforms, increasing automated regression coverage to over 85%.
- Implemented modular Page Object Model (POM) architectures and reusable custom fixtures with auto-waiting assertions and API mocking, cutting regression execution cycles by 65%.
- Designed and maintained end-to-end **REST API automated testing suites** using Playwright's built-in APIRequestContext and Postman, validating schema structures, payload integrity, and status responses across high-volume endpoints.
- Led quality validation for **Marten**, a specialized **RAG (Retrieval-Augmented Generation)** chatbot; evaluated LLM retrieval quality, source contract-groundedness, contextual precision, and security boundaries.
- Integrated modern AI development workflows using **Claude Code** to workflow.
- Configured automated CI/CD regression triggers in **Microsoft Azure Pipelines**, publishing automated test run results, artifacts, and execution traces directly into **Azure DevOps and Azure Test Plans**.
- Led a QA team of 3–5 engineers, conducting framework code reviews, sprint estimation, defect triage, and cross-discipline collaboration with developers and product managers.

Kohler | *2 years*

- Developed reusable test automation framework components and scripts for large-scale enterprise e-commerce platforms using **Java, Groovy, Geb, and Spock**.
- Automated UI interactions, validating data accuracy between front-end interfaces.
- Executed performance benchmarking and load tests using Apache JMeter and managed cross-browser cloud test runs using BrowserStack.
- Built reporting integrations using Bitbucket Pipelines, BrowserStack remote execution, and Azure-hosted daily automation reports.
- Coordinated with onshore client teams to define acceptance criteria, execute regression suites, and prepare sign-off reports for production deployments.

- Led a team of two, trained team members, reviewed requirements, and prioritized and estimated automation and testing activities.

Edlogic | *3 years*

- Understanding the requirement and having walkthroughs with Clients..
- Involved in documentation of test cases on JIRA and execution of them.
- Worked on Test plan draft creation and strategy and it's execution
- Risk assessment of the product and defining entry and exit point.
- Responsible for implementation of test plan according to the release cycle
- Regression test suite creation on Jira Zephyr
- Regression test suite execution and log bug
- Design image based automation test script test using Kantu tool

---

CERTIFICATIONS

- ISTQB Certified Tester Foundation Level (CTFL)
- ISTQB Agile Extension (CTAE)

EDUCATION

- Bachelor of Technology (B.Tech) in Electronics and Communication Engineering
  Bharat Institute of Technology | *2011 – 2015*
